The single-use **ROP Convenience Kit™** was developed in collaboration with Pediatric Ophthalmologists specializing in the research and treatment of the blinding disease *Retinopathy of Prematurity (ROP)*. Designed by Experts for Experts, our ROP KIT™ saves busy Clinicians and Hospital NICU staff time by improving their efficiency while minimizing waste and standardizing treatment procedures which may positively affect outcomes and safety.

CLINICIANS-IN-MIND CONVENIENCE

- **SAVES TIME - INCREASES PRODUCTIVITY** – No longer do NICU nurses and other hospital staff need to search, gather, process, sterilize, and then deliver procedure supplies from different departments which saves them time so they can be more productive!
- **SAVES MONEY** – Physicians and NICU staff waiting around for procedure supplies to arrive Costs your hospital money! NOT waiting for supplies Saves your facility money which is why our ROP KIT™ contains everything your staff needs for the procedure except the injection drug!
- **ELIMINATES WASTE** – Single-Use droppers ranging from 0.6ml to 5ml greatly reduce waste due to unused portions of larger droppers and vials which saves your facility money!
- **STANDARDIZES CARE** resulting in best practices which may positively affect outcomes and safety.
- **HIGH-QUALITY SINGLE-USE STERILE INSTRUMENTS** in each ROP Kit™ are pre-sterilized, ready for immediate use, and made out of stainless steel.
- **STURDY, RECYCLABLE CONTAINER** ships and stores easily.
- **FREE EYE DROP REPLACEMENT** of unused drops that have expired within (1) year of purchase.
